

DM5.0s

Versatile dynamic microphone !

Product Description

DM5.0S is a durable dynamic vocal microphone from our DM Series, engineered for performers who demand clarity, reliability and control in live sound environments.

Using the trusted DM capsule, DM5.0S delivers focused, powerful sound with a supercardioid pickup pattern that provides high gain before feedback and excellent off-axis rejection. This makes it ideal for vocals on loud stages, as well as instruments such as drums, guitars and brass, where precise isolation is required.

Built with a rugged zinc alloy body and reinforced steel mesh grille, DM5.0S is designed to withstand the physical demands of touring and frequent live use. The long-throw on/off switch ensures silent switching during performance, giving vocalists and presenters added control without unwanted noise.

Capable of handling high SPL levels without distortion, DM5.0S delivers clear, punchy audio night after night. Supplied with a 5 m XLR-to-XLR cable, it's ready to plug in and perform straight out of the box.

Key Features

- ✓ Wired
- ✓ Super Cardioid
- ✓ Solid Cast Metal Alloy
- ✓ Dynamic
- ✓ >135 dB Max SPL

Specifications

Specification	Value
Wired/Wireless	Wired
Transducer Type	Dynamic
Polar Pattern	Super Cardioid
Maximum SPL	>135 dB
Output Impedance	600 Ω
Off Axis Rejection	>20 dB at 180°
On/Off Switch	Yes - long throw
Switch Colour	Red
Pop Shield Colour	Black
Body Colour	Grey
Cable / Connector	3 Pin Gold Plated Pin XLR
Polarity	Pin 2 hot
Housing	Solid Cast Metal Alloy
Supplied Cable	5.0 Meter XLR (Socket) -> XLR (Pin)
Sensitivity	-52 dB (0 dB=1 V/Pa)
Microphone Weight (kg)	0.3
Included Accessory	User Manual, 5.0 meter XLR -> XLR cable
